deficiency disorders. The All India Institute of Medical Sciences, New Delhi had also conducted a survey in the Chandni Chowk and Kalkaji areas which revealed that about 55 per cent of the school children examined have suffered from various iodine deficiency disorders. Yet another survey conducted by the Institute of Nuclear Medicine & Allied Sciences showed that 20 per cent of the shool children examined by them suffered from various grades of Goitre and other iodine deficiency disorders.

(c) Intake of iodised salt is the simple and cheapest method for the control of Goitre and other iodine deficiency disorders. Adequate quantity of iodised salt is being provided to the Union Territory of Delhi. During the year 1987, a quantity of 97,430 MTs of iodised salt has been supplied against an estimated requirement of 42,800 MTs, to Delhi. In addition, financial assistance of Rs. 2.00 lakhs has been allocated to the Union Territory of Delhi for establishment of Goitre Control Cell and to undertake health education on Goitre under National Goitre Control Programme.
